ABOUT US

Polar Vista introducing SAVE 30 Electric System, Busbar Turning System.

Fluorescent SAVE30 Tube lighting is an energy efficient way to upgrade your garments factories, offices, banks, hotels, warehouse, showrooms. They can be installed just about anywhere and come in a wide range of wattage to meet any kind of lighting need. Replace existing fixtures or add additional lighting to your business place or residence. This investment will immediately begin saving you money on your power bill. They long term saving will surpass the initial expense in no time.

Busbar turning System (BBT), performs the function of transporting current from one point to the other. Traditionally cables were used for this function. BBT goes beyond what cables do.

BBT can tap off power to switchgear for further distribution using tap of boxes. In comparison to cables, BBT can thus serve as distribution panels at different stages (at floors of a building). BBT thus continues as a single systems to replace cables as well as distribution boards at floor level for garments factories, commercial and living buildings.

SAVE₃₀ PRODUCTS SPECIFICATION:

Operates from :
Colors Temperature :
Available Colors :
Available Sizes :
Available Watts :
Total Harmonic Distortion < 20%.

Special flexible clamps for luminary fitting.
Special high grade Fire Retardant PVC.
Comes with special dual prismatic cover for anti-glare effect.
